How to Transfer MP3 Audiobook Titles into iTunes Using Windows

What You Need

- iTunes (version 9.1 or newer)
- A library-borrowed MP3 audiobook title

Import Your MP3s

1. Open OverDrive Media Console on your computer.
2. Select a title that you have already downloaded. Click the Transfer button.
3. When the Transfer Wizard opens, click Next.
4. Make sure that **iTunes Library** is selected in the 'Player' field, then click **Next**.

The title is transferred (imported) into iTunes.

5. Click **Finish**. Your title will now appear in your iTunes library.

Once a title is in your iTunes library, you can listen from iTunes or easily transfer the files to your iPhone, iPad, or iPod.
