**Thursday, June 10, 2:00 - 3:00 PM**
Join film historian Keith Crocker as he uncovers the behind the scene stories of one of Hollywood’s most gorgeous screen sirens, Miss Hedy Lamarr. Austrian actress Lamarr (born Hedwig Eva Maria Kiesler) took the world by storm by appearing nude in the controversial 1933 German film Ecstasy. Fleeing her munitions making husband prior to the outbreak of WWII, Lamarr came to the United States and took Hollywood by storm. What made her even more remarkable was that she was an inventor. At the beginning of World War II, Lamarr developed a radio guidance system using frequency-hopping technology for torpedoes launched by the allied armies, intended to defeat the threat of jamming by the Axis. Yet, with all the beauty and brilliance displayed by this remarkable woman, she still never understood her popularity nor her appeal. Join us to pay tribute to this remarkable lady and give her all the due she deserves. Please register for this virtual presentation.
